

Why We Recommend Boarding Baths

Unlike at home, where dogs have their own items and sleep on the couch, at Sydney's Pet Spa, they share an exercise and common potty area with other pet guests. All of these areas are cleaned up, washed, disinfected and dried several times daily however no matter how clean we maintain our facility, the daily interaction of the pet guests may alter their natural scent. Weather conditions such as rain, humidity and snow will also impact their natural scent.

Due to these factors, we offer discounted boarding baths to all of our overnight guests and highly recommend that each pet guest be bathed prior to departure. We find that pet's love the attention and pampering they receive from a bath and the extra attention they get at home from looking good and smelling great. As an owner, you will appreciate the decrease in pet hair that results from a bath as well!

Ask a Sydney's Pet Spa associate today to quote you on a boarding bath price upon check-in.
